

Delhi Chief Minister Shri Arvind Kejriwal launched a mobile application 'Delhi Corona' helped by faculty members and students of IIIT-Delhi. The app will facilitate Delhi citizens to know how many beds and ventilators are available in which hospital in the national capital. Many congratulations to Dr. Tavpritesh Sethi and Prof. Ponnurangam Kumaraguru and their team for making this possible.

Three Professors from IIIT-Delhi are part of the Delhi Government innovation group setup recently by the Health & Family Welfare Department to develop and maintain the IT infrastructure to fight this pandemic.
